

## Education

---

- Ongoing     **Doctor of Philosophy**  
Department of Computer Science  
Supervised by Prof. Christophe Petit  
*Université Libre de Bruxelles*
- 2020 – 2022   **Masters of Mathematics**, Thesis option  
Department of Combinatorics and Optimization  
Supervised by Prof. David Jao  
*University of Waterloo*
- 2016 – 2020   **Honours Bachelor of Science**  
Specialist Program in Mathematics, Comprehensive Stream  
Graduated with High Distinction  
*University of Toronto*

## Awards

---

- 2022-2026     €5 500 FNRS Various travel credits to attend academic events
- 2022-2026     €30 721/a Fund for Research Training in Industry and Agriculture Grant
- 2024           €4 000 ULB Faculté des Sciences travel credit
- 2022           €36 489 Université Libre de Bruxelles, Doctoral Scholarship (DECLINED)
- 2021           \$15 000 Queen Elizabeth II Graduate Scholarship in Science and Technology
- 2021           \$10 000 President’s Graduate Scholarship, University of Waterloo
- 2020           \$2 000 Combinatorics and Optimization Department Award
- 2020           \$1 700 University of Waterloo Graduate Scholarship
- 2020           \$2 000 Math Domestic Graduate Student Award
- 2020           \$3 700 Graduate Research Studentship
- 2018           \$5 000 Canadian Queen Elizabeth II Diamond Jubilee Scholarship
- 2016           \$2 000 University of Toronto President’s Entrance Scholarship

## Publications

---

Gustavo Banegas, **Valerie Gilchrist**, Anaëlle Le Dévéhat, Benjamin Smith. *Fast and Frobenius: Rational Isogeny Evaluation over Finite Fields*. International Conference on Cryptology and Information Security in Latin America (LatinCrypt) 2023.

- Improves runtimes of the state of the art for evaluating isogenies with both rational and irrational kernel groups.
- Authors listed in alphabetical order.

Gustavo Banegas, **Valerie Gilchrist**, Benjamin Smith. *Efficient supersingularity testing over  $F_p$  and CSIDH key validation*. Mathematical Cryptology (MathCrypt) 2022.

- Investigates algorithmic improvements to two supersingularity tests, in the context of CSIDH. Proposes a new algorithm for the state of the art, with a run-time improvement.
- Authors listed in alphabetical order.

## Research Experience

---

Ongoing **Doctoral Research**  
Université Libre de Bruxelles

Worked under the supervision of Dr. Christophe Petit. Researched topics related to the cryptanalysis of post-quantum cryptosystems, with particular emphasis on isogeny-based systems.

Reviewed research papers on behalf of PQCrypto 2024, EuroCrypt 2023, and AsiaCrypt 2023.

Spring 2024 **Research Visit**  
University of Auckland

Collaborated with Dr. Steven Galbraith on projects related to isogeny-based cryptography. Project topics included computational number theory, and pairings-based cryptography. Spoke in two different seminar groups about original research.

August 2023 **Isogeny Graphs in Cryptography Workshop** (invited participant)  
Banff International Research Station

Participated in brainstorming sessions for open problems in the field, and later worked in smaller groups to develop some of the ideas that were presented.

June 2023 **Summer School on Real-World Crypto and Privacy**  
Vodice, Croatia

Was accepted into the summer school, hosted jointly by Radboud University, ETH Zurich, and University of Zagreb. Received partial funding from the school to attend. Attended talks by industry professionals and academics in a wide variety of areas relating to cryptography and privacy.

Summer 2022 **Research Visit**  
National Institute for Research in Digital Science and Technology (Inria)

Collaborated with Dr. Benjamin Smith and his team on projects related to isogeny-based cryptography including the use of radical isogenies in signature schemes and key validation techniques in key-exchange schemes. The visit was funded by both the University of Waterloo and Inria.

Published *Efficient supersingularity testing over  $F_p$  and CSIDH key validation* in the affiliate event of Crypto, MathCrypt. It was later published in a special edition of Mathematical Cryptology.

2020-2022 **Master's Research**  
University of Waterloo

Researched isogeny-based cryptography under the supervision of Dr. David Jao. Explored different approaches of editing the signature scheme SQISign for use on off-blockchain transactions by studying already published adaptor signatures. The thesis was read and approved by Dr. David Jao, Dr. Douglas Stebila, and Dr. Alfred Menezes.

Reviewed research papers on behalf of AsiaCrypt 2021.

August 2021 **Isogeny Summer School**  
University of Bristol

Attended an 11 week-long intensive summer school, lectured by more than 20 professionals and researchers working in the field. Topics spanned all areas relating to isogeny-based cryptography, including both implementation and theory concepts.

## Teaching Experience

---

2020-2022 **Teaching Assistant**  
University of Waterloo

Worked directly with professors to develop exam questions. Held weekly office hours and answered questions on the discussion forum for both undergraduate and graduate level students. Graded assignments and exams. Courses included:

- Applied Cryptography
- Public Key Cryptography
- Introduction to Combinatorics
- Introduction to Geometry

2017-2020 **Teaching Assistant**  
University of Toronto

Lead weekly two hour and one hour tutorials with an average class size of 30 students. Wrote and graded quizzes/assignments. Invigilated and graded midterms and finals. Held weekly office hours. Courses included:

- *Calculus I for the Life Sciences*
- *Linear Algebra I for the Mathematical Sciences*
- *Calculus of Several Variables I*
- *Calculus of Several Variables II*
- *Algebraic Cryptography*

Performed grading duties for:

- *Introduction to General Relativity*
- *Introduction to Mathematical Logic*

## Conferences and Invited Talks

---

- 2023      **SIAM Conference: Algebraic Geometry**  
Eindhoven, Netherlands
- Gave a talk in the post-quantum cryptography mini-symposium. Discussed original research about supersingularity testing of elliptic curves.
- 2023      **Erasmus Mundus Cyberus Summer School** (invited speaker)  
Held Virtually
- Gave an introduction to post-quantum cryptography as part of the Cyberus summer school for Masters students.
- 2023      **Isogeny Club** (invited speaker)  
Held Virtually
- Presented the talk *Computing rational isogenies from irrational kernel points* (video and slides available).
- 2022      **Isogeny Days (IsoCrypt)**  
KU Leuven
- Presented on original research about supersingularity tests (video and slides available). Attended other technical talks. Participated in workshops, investigating new research problems.
- 2022      **MathCrypt (affiliate event of Crypto)**  
University of California, Santa Barbara
- Presented on the accepted paper *Efficient supersingularity testing over  $F_p$  and CSIDH key validation* (video and slides available). Attended technical seminar talks.

## Professional Experience

---

- 2018-2019      **Business Intelligence Work Study Student**  
University of Toronto Scarborough Campus
- Regularly used Tableau and Microsoft Office programs.
- 2017      **Summer Student Data Analyst**  
University of Toronto, Business Intelligence

Regularly used programs such as Python, R, Tableau, VBA, and SQL.

## Extracurricular and Volunteer Experience

---

- 2023      **Women in STEM Week at ULB**  
Université Libre de Bruxelles  
Gave talks to visiting school children to introduce them to the field of cryptography.
- 2020-2022      **Department of Combinatorics and Optimization Mentorship Program**  
University of Waterloo  
Worked with incoming graduate students to ease the transition into their programs.
- 2018-2019      **Association of Mathematics and Computer Science Students (AMACSS)**  
University of Toronto Scarborough Campus  
Held weekly office hours and exam review sessions for assigned courses.
- 2018      **Students Without Borders Internship Placement**  
World University Service of Canada, Lilongwe, Malawi  
Worked as a Knowledge Management Officer with a local NGO.
